

# Evaluation

## **Why should I go to Nevyas Eye Associates?**

We at Nevyas Eye Associates have a number of special advantages. We have a long experience and a superb reputation in eye surgery in general and specifically in refractive surgery. We were pioneers in refractive surgery, and we've developed a number of instruments and techniques, which are widely used. Our commitment to excellence in eye surgery has been recognized by the Delaware Valley Refractive Surgery Partnership, a professional association of 350 eye doctors in the Delaware Valley who have chosen us as their refractive surgeons of choice. We conduct many educational seminars for Delaware Valley eye doctors on the subject of refractive surgery, and when requested, we often co-manage refractive surgical patients with them to provide better care and more convenience for our patients. We use the most up-to-date laser system, which combines small laser beam reshaping with unparalleled eye tracking capabilities. We strive to give you the highest quality experience from start to finish, and our goal is to make you as comfortable as possible throughout your entire time with us.

## **Do you think I need refractive surgery?**

No one must have refractive surgery. It is an elective procedure. Many people can benefit from it, however. Refractive surgery can make a person less dependant on contact lenses and glasses. This can be valuable from a quality of life standpoint and even, in some circumstances, from a safety perspective. Many professions and activities could be performed in a much safer way without having to depend on glasses or contact

## **Am I a candidate for refractive surgery?**

Most people dependent on glasses and/or contact lenses, who are at least 21 years of age, can be considered candidates. We are able to correct nearsightedness, farsightedness, astigmatism and presbyopia, and in many cases we can correct higher order aberrations of the eye to produce a higher level of sharp vision. The best way to find out if you are a true candidate, and which procedure is best suited for you, is to schedule a free evaluation with one of the refractive surgeons at Nevyas Eye Associates, Dr. Herbert Nevyas, Dr. Anita Nevyas-Wallace, or Dr. Vipin Goyal.

## **Can I change my mind about surgery after I go for this evaluation?**

Yes, this is an elective procedure. You may change your mind at any time. Before you decide whether or not to have the procedure, we will explain it to you, as well as possible complications and expected results. We want you to be fully informed so that you will have all the information you need to make the right decision.
